Are turbidity sensors available for FieldKit Water?

Lindsay Starke - 2026-05-20 - [Comments \(0\)](#) - [Sensors and Modules](#)

There is a ton of interest in affordable, reliable open source turbidity sensors, and we would love to offer them for FieldKit. This is a big challenge and will require a lot of resources (both engineering-time and financial). We are interested in partners who could assist in this effort, either in terms of building the sensor or helping to fund the work on our end. If this is something you might be able to help with, please contact us and let us know more.
