Can I export data from the FieldKit Portal to use elsewhere?

Lindsay Starke - 2025-04-02 - Comments (0) - Data

Yes! You can currently export data via CSV.

Eventually, we plan to also offer export in JSON Lines, raw, GeoJSON, a PDF data report, and R, D3, Jupyter Notebook projects with working code examples.

Finally, the FieldKit Portal offers social sharing, with "data views" offering data points or ranges that can be copied and pasted, emailed, or shared on compatible social media platforms.
