Do you have water level sensors that can be connected to FieldKit Water?

Lindsay Starke - 2025-04-02 - Comments (0) - Sensors and Modules

Yes, we have water level sensors! Water level sensing is included in the [Distance sensor pack](#). You can deploy your water level sensor in conjunction with other FieldKit sensors, anchoring the kit on land near the water line. You could also combine a distance sensor with any of our water quality sensors in the other three sensor bays, you would just need to route the distance sensor further away.
