Do you have water level sensors that can be connected to FieldKit Water?

Lindsay Starke - 2026-04-02 - [Comments \(0\)](#) - [Sensors and Modules](#)

Yes, we have water level sensors! Water level sensing is included in the Distance/Level sensor pack. You can deploy your water level sensor in conjunction with other FieldKit sensors, anchoring the kit on land near the water line. You could also combine this sensor with any of our water chemistry sensors in the other three sensor bays, you would just need to route the distance/level sensor further away.
