## **It looks like bugs have nested in my rain gauge. What should I do?**

Lindsay Starke - 2026-04-29 - [Comments \(0\)](#) - [Sensors and Modules](#)

If there's any suspicion of insect or arachnid infiltration in the rain gauge, squeeze the sides of the cover and lift it up to reveal the tipping bucket inside. Use a brush or small twig to clear out the intruding creatures and put the cover back on.
