App Release 3.0.3

2025-04-07 - Lindsay Starke - [Comments (0)](#) - [App Updates](#)

We're excited to announce the release of version 3.0.3 of our mobile app, with several enhancements and bug fixes to improve your experience. Here's a summary of what's new:

New Features:

- **Forget Station:** You can now forget stations you've previously connected to in the app if needed.

- **Stay Awake for Download:** Your mobile device will now stay awake during data downloads to avoid interruptions.

- **Navigate to Your Station:** The map cursor now includes directional field-of-view navigation to help direct you to your station in the field.

Bug Fixes:

- **Calibration Bugs Squashed**: Critical bugs in the calibration process were fixed for better performance and ease of use.

- **Station Status Updates:** Improved for better reliability when getting a station status update in the app.

- **Deploy Button Layout Fixed**: Issues with the deploy button layout were resolved.

We appreciate your feedback and encourage you to report any issues you find—we'll do our best to fix them in the next update!
